Note:

This Table uses data from URS/DIG Table 2a, Table 2b and from the U.S. Census Bureau.

All denominators use U.S. Census data from 2000.

U.S. Totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

2a 1) Data from biennial Patient Characteristics Survey conducted system-wide during final week in October 2001. Annual estimates prepared using capture-recapture methodology, formula created by Laska, Meisner, Siegel (Biometrics, June 1988), and adjustments following validation with enumeration data sets. Hispanic ethnicity may be underreported due to structure of survey question. Hispanic ethnicity was included with race. Only 5% of persons selecting Hispanic ethnicity indicated a race. 2) Asian includes Native Hawaiian and other Pacific Islanders.

2b Hispanic ethnicity may be underreported due to structure of survey question. Hispanic ethnicity was included with race. Though respondents were instructed to select multiple race/ethnicities, only 1% of persons selected more than one category.

	State	% Total	%Total	US
	<u>Expenditures</u>	<u>State</u> <u>Expenditures</u>	<u>US Expenditures</u>	<u>Expenditures</u>
State Hospitals	\$ 992,565,135	30%	32%	\$ 7,298,364,471
Other 24-Hour Care	\$ 791,445,541	24%	17%	\$ 3,971,507,623
Ambulatory/Community	\$ 1,418,743,500	43%	49%	\$ 11,199,123,996
Central Office, Research, Training, Prvention,	\$ 128,934,042	4%	3%	\$ 594,043,226
TOTAL	\$ 3,331,688,218			\$ 23,063,589,317

Note:

Other 24 Hour Care includes Residential care in state hospitals and inpatient and residential care in communities
Data from NRI's Funding Sources and Expenditures of State Mental Health Agencies, FY'2001 report,

State Notes:

Any use of the New York State data for comparative purposes must be done with care. Differences in the way states' budget for mental health programs and services, and the way states define and report "state-controlled" expenditures, result in non-comparable data. The NASMHPD Research Institute does not adjust the data to reflect such differences. Therefore, these data consist of states' self-reported expenditures that are under the control of the State Mental Health Agency (SMHA) and not total mental health expenditures of each state. The differences may be substantial. Total mental health expenditures under the control of the State Office of Mental Health, for instance, are estimated to be only 70 to 75 percent of total mental health expenditures in the state. Other important points specific to New York State provided data: 1) New York data include expenditures for mental health services provided to geriatric patients in State psychiatric hospitals. Many states do not reflect such expenditures, as these patients are treated in skilled nursing facilities. 2) Many states treat forensic patients within their correctional system and, as a result, costs for this treatment are not reported as SMHA-controlled expenditures. In New Y
